

Damianos Savvopoulos

Mechanical Engineer / Software Developer

Experienced mechanical engineer, with a strong background in Building Mechanical Installations, Building Energy Inspections and Mechanical Systems Inspection. Working in the Elevator Industry since 2016. Formerly as a Project / Sales Support Engineer in the Engineering Department, currently as a Software Developer in the IT Department.

Work History

03/2024 – Junior Developer (Software Development)

Today

Metron Automations S.A., Serres

- Participating in the company's ERP transition project, helping restructure the product database and implement an attribute-based configuration system for configurable items.
- Developing and maintaining internal web applications using the .NET MVC framework (C#, JavaScript, HTML, CSS) to replace legacy Excel-based tools and integrate directly with Microsoft Dynamics 365.
- Designing and managing SQL database structures and logic to ensure accurate calculation of item codes and attributes during order registration.
- Collaborating with cross-functional teams to translate operational needs into efficient software solutions that streamline order handling and production workflows.
- Supporting ongoing optimization and automation efforts, focusing on data consistency, usability, and smooth integration between software tools and ERP processes.

12/2016 – Project Engineer (Elevator Industry)

03/2024

Metron Automations S.A., Serres

- Supporting the sales department and our customers to provide the optimal solution and offer for each project.
